Webmaster Scripts WMScripts.net

HotOrNot Clone

\$7.00

This Hot Or Not php script uses a mysql database to store members, submitted pictures, and votes. This script makes a great stand alone website or can be used as an addition to any website.

Visitors who register can upload the amount of pictures set by administration (you). Members can contact other members. Non-members can surf the site and vote on randomly displayed pictures.

This script is setup with a newsletter to keep the admin (you) in touch with members. It also comes with a banner rotator which allows admin (you) to sell banner advertising.

Simple administration area allows the admin (you) to set picture approval, comment approval, confirmation email, backup database, edit emails, send newsletter, add/delete banners in rotation, view/edit/delete members, and more.

Installation of this script is simple along with the included detailed installation instructions. You can have this script installed and ready for pictures within 5 to 10 minutes.

Features:

- * Popular Picture Rating Website
- * Keep Members And Visitors Coming Back
- * Sell Banner Advertising
- * Simple Administration Area
